rates.

HIRE TWO-WAY RADIOS

For 30+ years, DCRS have been hiring out two-way radios, and this has proven to be invaluable for a multitude of market sectors: **Event Organisers, Retailers, Construction Sites, Council Teams, TV and Film Crews, Security and Plant Shutdowns**, to name but a few with short and long-term hire contracts with DCRS. We can support requirements in the **UK, Europe and beyond**.

The benefits of hiring two-way radio equipment from DCRS:

- ▶ Every hired two-way radio we supply comes with a long-life, lightweight lithium-ion battery
- ▶ **Last minute order?** No problem. Our cut-off for next-day delivery on our hired two-way radios is 16:00hrs
- ▶ All of our **Motorola Repeaters** are supplied with a suitable antenna, battery backup system and lockable cabinet/rack (if required) and with Capacity Plus for maximum efficiency
- ▶ We can carry out a complete radio site survey/product evaluation before your rental commences to ensure you are covering your required footprint without black spots
- ▶ A full range of audio accessories, radio allocation systems and voice recording available
- ▶ We offer a free-of-charge OFCOM two-way radio license, the arrangement of specialised frequencies directly with OFCOM or programming to your radio fleet frequencies (if required)
- ▶ We have a **no-quibble service exchange policy** covering all of your equipment. In the event of a product failure, we will dispatch replacements or, in the case of a radio system, an engineer. (If equipment fails during a weekend/bank holiday, we have a team on hand to assist.)
- ▶ We can offer **worldwide on-site engineering support** throughout each project or event (if required)
- ▶ We provide **personalised on-site hire training guides** for all users
- ▶ All equipment can be shipped in heavy-duty transit cases

Optional on-site support

If you would like DCRS to manage your walkie-talkie radio system while it is on hire, we can offer a fully qualified DCRS engineer to be on-site for the duration of your hire to give total support, leaving your operations team free to manage their event/site. Our engineering team will install all of your equipment and set it up in one central, accessible location.
